**DETAILED ACTION**

1. All outstanding rejections, except for those maintained below, are withdrawn in light of applicant's amendment filed on 11/5/2009.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.
3. No new grounds of rejection are set forth below. Thus, the following action is properly made final.

***Claim Rejections - 35 USC § 103***

4. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohkawachi et al (US 5,677,055).

The rejection is adequately set forth in paragraph 4 of Office action mailed on 5/7/2009 and is incorporated here by reference.

***Response to Arguments***

5. Applicant's arguments filed 11/5/2009 have been fully considered but they are not persuasive. Specifically, applicant argues that the stretched resin film of Ohkawachi et al is not a sliding member.

In response, while Ohkawachi et al teaches that its composition can be used in a film, this does not negate the fact that articles made from the composition, including the film, are capable of performing sliding functions. it is the examiner's position that the preamble does not state any distinct definition of any of the claimed invention's limitations and further that the purpose or

Art Unit: 1796

intended use, i.e. “sliding” member, recited in the present claims does not result in a structural difference between the presently claimed invention and the prior art invention and further that the prior art structure which is a composition identical to that set forth in the present claims is capable of performing the recited purpose or intended use. Case law holds that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Note that the body of claim does not provide any structural limitation to the sliding member.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
